

TABLETS MID | HD MEDIA PLAYERS | GPS NAVIGATION

**GOCLEVER Technology Co., Ltd.** is Mainland China based company established in 2006 as GPS Hardware Manufacturer and Software Developer. The company headquarters is located in Shenzhen, China. This is also place for the company's manufacturing base, R&D facility and overseas sales and marketing operation. With several international offices and representatives across Europe, company has quickly risen to become TOP 3 GPS Navigation Vendor in Eastern & Central Europe & CIS.

Considering innovation as main factor of its growth – GOCLEVER will present next to new family of GPS navigators – GOCLEVER Navio™, two new product lines – Android based Tablets (iPad's competition) – GOCLEVER TAB and HD Media players – Cineo™.

Looking back at GOCLEVER fast growth on GPS products we believe, that carefully selected new product lines will be warmly accepted by current customers, and attract new ones!

## ANDROID TABLET | GPS NAVIGATION | GPS TRACKING | HD MEDIA PLAYER

### **OEM Projects – ONE EASY WAY TO BUILD YOUR OWN BRAND**

We offer our OEM customers very easy, fast and convenient procedure. We prepare every project in details and always talk with customers to find best result. We pay much attention to packaging. We help customers to choose most suitable type of packaging for their sales channel.

The working scheme is very simple. After choosing the product and providing us with your logo artwork, we will send you back a visual of the already labeled product. If you accept the result, we will proceed to mass production. After production is finished we will send you real photo of your products and then to proceed shipping.

THE GOCLEVER TAB  
**MUST HAVE PRODUCT IN YOUR OFFER IN 2011.**

Navigation Software:

## GOCLEVER DON'T PANIC viaGPS 4.0

World's  
1<sup>st</sup> class  
NAVIGATION  
APPLICATION

### KEY FEATURES:

- > Routing up to **100x** faster than any other system
- > Search – the most powerful engine ever
- > The fastest and the most detailed 3D map rendering
- > Landmark navigation
- > Map rotation and view angle change, tachometer, map images, route history, route optimisation, 3D buildings
- > User-Friendly graphic design along with many workflow changes and improvements
- > Intuitive user interface
- > Foto-navigation
- > Tracking – for fleet management
- > Speed cameras warning

### NAVIGATION EXPERIENCE

Developing 4th generation of navigation software, we were guided with the idea to create unique navigation experience to you, our customers. As the phrase Don't Panic in such a context should stand for – You are not lost, we do believe that with all emphasized features together with other, most common ones, we managed to deliver very powerful and unique navigation. Either through specifics like easy to search, fastest routing, smart navigation options, landmark navigation, poi along the route or through many other like pedestrian navigation, lane and signpost information, 3D view, auto zooming, TMC, and many more....

Don't Panic will intrigue you because of simplicity and user friendliness.

**We care for you not to get lost!**
